

Attorney Docket: 01442
U.S. Application No. 10/037,005 Examiner Van Handel Art Unit 2623
Response to July 13, 2007 Final Office Action

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A method for receiving subscriber content-choice information, comprising:

collecting subscriber content-choice data from a plurality of service providers ~~subscriber content-choice databases~~, each service provider collecting the subscriber content-choice data from their respective subscribers, each subscriber's content-choice data related to a subscriber's viewing preferences for content, and each subscriber's content-choice data describing a type of a service provider that provides the content and a name of the service provider; and

storing the subscriber content-choice data in a database;

receiving a request for the subscriber content-choice data, the request specifying at least one of the type of the service provider and the name of the service provider;

querying for the subscriber content-choice data associated with at least one of the type of the service provider and the name of the service provider; and

responding to the request with the subscriber content-choice data.
2. (Currently Amended) The method of claim 1, further comprising assigning a classification to the subscriber's content-choice data ~~wherein the subscriber content-choice data comprises data relating to viewing preferences of at least one subscriber.~~
3. (Currently Amended) The method of claim 2 1, wherein the subscriber content-choice data comprises data relating to a television program received by the at least one subscriber.
4. (Previously Presented) The method of claim 3, wherein the subscriber content-choice data comprises at least one of date information and time information related to the television program.

Response to July 13, 2007 Final Office Action

5. (Currently Amended) The method of claim 2 1, wherein the subscriber content-choice data further comprises data relating to the ~~at least one~~ subscriber.
6. (Currently Amended) The method of claim 5, wherein the data relating to the ~~at least one~~ subscriber comprises a subscriber identifier ~~for a subscriber~~.
7. (Currently Amended) The method of claim 5, wherein the data relating to the ~~at least one~~ subscriber comprises demographic data ~~for a subscriber~~.
8. (Currently Amended) The method of claim 2 1, wherein the subscriber content-choice data further comprises data relating to a subscriber system.
9. (Currently Amended) The method of claim ~~8~~ 1, wherein collecting the subscriber content-choice data comprises receiving an eXtensible Markup Language file having linear data describing the type of the service provider, the name of the service provider, and a location associated with the service provider ~~the data comprises a cable system operator providing content to the subscriber system.~~
10. (Currently Amended) The method of claim 1, wherein the subscriber content-choice data comprises data relating to an advertisement received by the ~~at least one~~ subscriber.
11. (Currently Amended) The method of claim 1, wherein the subscriber content-choice data comprises data relating to a viewing pattern of the ~~at least one~~ subscriber.
12. (Currently Amended) The method of claim 1, wherein receiving the request for the subscriber content-choice data comprises receiving an electronic request form that is standardized for all the service providers ~~the subscriber content-choice data comprises at least one subscriber classification.~~

Response to July 13, 2007 Final Office Action

13. (Currently Amended) The method of claim 1, further comprising periodically requesting that the service providers send their respective subscriber content-choice data for storage in the database wherein the subscriber content-choice data comprises content-choice summary data.
14. (Original) The method of claim 1, further comprising sorting the collected subscriber content-choice data.
15. (Currently Amended) A system method for receiving and distributing content-choice information, comprising:

means for collecting subscriber content-choice data from a plurality of service providers, each service provider collecting the subscriber content-choice data from their respective subscribers, each subscriber's content-choice data related to a subscriber's viewing preferences for content, and each subscriber's content-choice data describing a type of a service provider that provides the content and a name of the service provider;

means for storing the subscriber content-choice data in a database;

means for receiving a request for the subscriber content-choice data, the request specifying at least one of the type of the service provider and the name of the service provider;

means for querying for the subscriber content-choice data associated with at least one of the type of the service provider and the name of the service provider; and

means for responding to the request with the subscriber content-choice data

~~collecting subscriber content-choice data from a plurality of subscriber content-choice databases;~~

~~storing the subscriber content-choice data in a database;~~

~~retrieving stored subscriber content-choice data; and~~

~~providing the retrieved subscriber content-choice data to a requesting party.~~
